

Make history. Build the future.

Senior Bridge Engineers – Sydney

- Healthy work/life balance
- World renowned projects
- Industry competitive salary

At RTA, we love a challenge. That's why we're all about changing the face of the future with superior engineering technology and support in New South Wales.

Pooling the talent of the Australian Engineering market, we're putting together a select team of Senior Bridge Engineers to drive and direct all aspects of bridge concept, design, construction and maintenance. We have four exciting opportunities to lead in these focus areas:

- Policy and Specifications
- Technology and Practice
- Rehabilitation and Design
- Strategic Capability

An experienced team will be engaged to support you in the delivery of your role, whilst you work along side

a wider network of Senior Engineering professionals. You and your team will liaise with regional RTA offices, plan construction and maintenance, identify high level strategic issues and develop processes in relation to your focus area.

There's simply no better place than RTA to build your career and shape your future.

So if like us, you live for a challenge and want to be at the forefront of bridge engineering for the future, contact Amy Warren on (02) 9350 8308 or email your resume to rta@constructive.net.au
