

senior estimator

Thiess Process delivers innovative, integrated solutions for complex projects in the Coal, Mineral Resources, Oil & Gas, Water and Power sectors through combining engineering, procurement and construction expertise with extensive Project Management experience.

Reporting to the Strategy and Business Development Manager, you will be able to autonomously prepare complete estimates and feasibility studies, budget quotations and expressions of interest in alignment with company tendering procedures and sound engineering practices.

You will be commercially astute, participate in risk and opportunity analysis for the tender, tender review and sign off. You must be able to participate and provide direction in contract handover and be able to liaise with the relevant stakeholders.

Experience in a similar position as well as relevant qualification in engineering or trade-based background will be highly regarded.

Travis Wentriro: travis@constructive.net.au

project manager

As one of Queensland's leading private construction, property and development companies, McNab are leading the way within the commercial and industrial sectors throughout Queensland.

With several commercial, retail and industrial projects in both Brisbane and Townsville there is a need for 2x Project Managers to join their construction team. As the successful candidates you will have the following:

- A proven track record of commercial and/or industrial construction projects
- The ability to work autonomously on projects
- A desire to be part of a progressive people-focused company.

In return for your expertise you will be offered an outstanding remuneration package which will be commensurate with experience.

Jess Mitchell: jess@constructive.net.au

qld engineering manager

With an ethos of delivering quality projects, this privately owned Australian contractor provides piling solutions for major infrastructure projects throughout Australia.

As the QLD Engineering Manager you must have formal civil engineering qualifications, 8yrs+ post graduate experience in a similar leadership role, have extensive experience in the piling industry with large diameter bored piles, secant pile walls in construction of ventilation and service shafts, retaining walls, ground improvement, driven piles, offshore piling and have had exposure to major infrastructure projects. Day-to-day management, developing technically based solutions for clientele and the execution of piling works, with a safety first attitude, will be your responsibilities for all of QLD.
